

DEFENDER[®]  **Diamond**
professional tattoo equipment

After a whirlwind success in 2020 DEFENDERR
is issuing a new model

-

even more powerful and balanced machine
for permanent make-up

DEFENDERR[®] 
professional tattoo equipment

Universally used short stroke machine for any
permanent make-up technique, compatible
with the majority of the popular modules and
power supply units

It is based on the innovative German motor
by well-known Faulhaber company which
enables the user to feel confidence when
working on any skin area

MAIN ADVANTAGES - MODERN
POWERFUL MOTOR, CALIBRATED
BALANCE AND NO ANY NOISE OR
VIBRATION WHILE WORKING

Needle bar stroke

Short stroke of 2.5 mm enables solid covering at a high speed with minimal skin injury risk

Power

Upgraded motor allows DIAMOND machine to draw even more accurate and smooth lines making it an ideal tool for microblading

Balance

Machine's weight focus is in the middle of the body which enables a user to feel no muscle strain for a long time. Ergonomic machine body fits perfectly the hand of a tattoo master becoming its integral part.

Machine's body frame is made of durable and light-weighted material – aircraft-grade aluminium – with special coating which protects device from dents and corrosion. Elaborated machine body design prevents ink from getting inside and guarantees device is fully sterile.

DIAMOND can be easily disassembled, and its dismountable grip may be cleaned in a dry heat autoclave.

Any spare part may be replaced and/or repaired which ensures reliable use for a long time.

DIAMOND was designed in the US and its motor was manufactured in Germany in cooperation with

DEFENDERR company ensures quality of our device and may guarantee maintenance service during 1 year as well as replacing any spare part free of charge.

Flexible though endurable clip cord with RCA connector comes standard with the machine.
